SUMMARY

Computer Science senior with hands-on experience leading technical projects and collaborating with cross-functional teams. Combines full-stack development and data analysis with strong project coordination and client-facing communication. Seeking technology consulting or entry-level product/project roles to deliver practical, scalable solutions at the intersection of business and technology.

EDUCATION

University of Houston, Houston, TX

Expected May 2026

Bachelor of Science in Computer Science, Minor in Mathematics

SKILLS

Programming and Data: Python, R, SQL, JavaScript, TypeScript, C++, HTML/CSS

Frameworks and Databases: React, Vite, Next.js, Node.js, Express, Django, PostgreSQL, MySQL, MongoDB, AWS, Azure

Tools: Git, GitHub, Microsoft Office (Excel, PowerPoint, Word), VS Code, Google Colab, Agile methodologies

EXPERIENCE

Code Ninjas, Houston, TX

Dec 2024 – Present

Coding Instructor

- Led weekly programming sessions for 30+ students, transitioning learners from block-based tools to JavaScript using VS Code and project-based assignments
- Designed and facilitated immersive camps in game development, robotics, and creative engineering, managing class logistics, pacing, and engagement

CAHSI REU, Remote

Jan 2025 – June 2025

Machine Learning Researcher

- Developed and evaluated a Vietnamese-English neural machine translation system for clinical text, improving BLEU scores by ~25% over baseline models
- Designed and executed preprocessing and evaluation pipelines with SentencePiece, BPE, and SacreBLEU, enabling systematic performance tracking that revealed key improvements in low-resource settings

PROJECTS

NAVI – Intelligent Personal Assistant | Next.js, Tailwind CSS, MongoDB

Oct 2025 – Oct 2025

- Led a cross-functional team of 4 to scope, design, and deliver an AI-powered digital assistant that unified Gmail, Outlook, and Calendar data, earning 3rd place out of 100+ teams at CodeRED Hackathon 2025
- Designed a modular data aggregation framework and integrated natural language, voice, and mapping services, reducing data-sync latency by 60% and enabling scalable, plug-and-play integrations

Volunteering Web Application | React.js, Vite, Node.js, Express.js, PostgreSQL, AWS

Aug 2025 – Dec 2025

- Designed and delivered a full-stack volunteer management platform enabling users to register, manage profiles, and be automatically matched to events based on skills, availability, and location
- Implemented secure authentication, data persistence, and reporting tools (PDF/CSV) on AWS-hosted PostgreSQL, supporting notifications and volunteer history tracking for improved coordination and visibility

LEADERSHIP

UH NSM Career Center, Houston, TX

Aug 2025 – Present

Student Director

- Led planning and execution of career fairs, internship bootcamps, and employer pop-ups, engaging 1,000+ students and 70+ employers
- Managed relationships with employers and university partners to strengthen recruiting pipelines and event outcomes
- Evaluated and managed internship, full-time, and research opportunities, ensuring alignment between employer needs, student interests, and institutional goals
